

High Purity Water Hose

Co-Operative Industries Aerospace now offers a sanitary hose product for use in dispensing, circulating, and transferring potable water for commercial aircraft. This specially constructed water hose is FDA approved and meets or exceeds NSF/ANSI Standard 61 drinking water standards. It is an excellent product for use with flight line potable water stations.

Our High Quality Water Hose Offers:

- Seamless mirror finish on inner liner
- Will not promote bacteria growth
- Abrasion resistant cover. The smooth exterior allows for easy handling.
- Light weight-to-strength ratio
- Sturdy construction

Specifications

Size:	ID: 0.75 in. (19,05 mm) OD: 1.095 in. (27,813mm)
Working Pressure at 70°F:	200 psi
Burst pressure at 70°F:	650 psi
Temperature Range:	-20°F to +130°F
Color:	Blue (Other colors available, minimums apply)
Inner Liner:	FDA White compliant formulation. Will not contribute to bacterial growth and meets or exceeds NSF/ANSI Standard 61 for Drinking Water System Components.
Construction:	The hose wall is comprised of a high performance, melt-processable rubber compound reinforced with polyester
