

IGNITION LEADS

Manufacturing and Repair

Co-Operative Industries is a customer oriented team that offers extensive experience in ignition lead solutions. We are AS9100 registered and are vertically integrated for flexibility throughout the manufacturing process. If you are experiencing quality or engineering concerns with a current design, Co-Operative Industries can address these issues and re-engineer a cost effective and reliable solution. In addition to manufacturing capabilities, our FAA, EASA, and CAAC Certified Repair Station offers prompt check & test, repair, and overhaul services.
